ammariect@gmail.com

Hamlyn Heights, Geelong, VIC

ahmadammari

anammari

Objective

To secure a data science role that leverages my expertise in machine learning, predictive modeling, and advanced analytics to deliver data-driven solutions and insights that positively impact the business

EXPERTISE

- Statistical modeling in R & Python
- SQL for data analysis
- Artificial Intelligence
- Natural Language Processing
- ETL and Feature Engineering
- Big Data, Cloud, and ML Ops

Language

- English (advanced)
- Arabic (native)
- French (basic)

Summary of Qualifications

- 9+ years of experience in data science and advanced analytics with proven ability to collect, analyze, and interpret complex data to uncover insights and trends.
- Expertise in statistical analysis, predictive modeling, machine learning, data mining, data visualization, and AI/ML to develop data products.
- Proficient in Python, R, SQL, NoSQL, Hadoop, Spark, TensorFlow, PyTorch, scikit-learn, Pandas, Matplotlib, AWS, GCP, Azure.
- Expertise in generative AI and large language models.
- Microsoft Certified Azure AI Engineer Associate
- Experience leveraging cloud technologies and applying ML models in real-world business contexts to drive measurable impact.
- Strong communication and collaboration skills to effectively present findings and partner with stakeholders across business units.

Education

University of Bradford, West Yorkshire, UK
PhD in Computing and Mathematics
2005-2010

Research focused on developing novel techniques in web data mining, text mining and natural language processing to support intelligent information retrieval and recommendation systems.

Arab Academy for Banking and Financial Sciences, Amman, Jordan
MSc in Computer Information Systems
2001-2004

Specialized in AI, machine learning, application development and electronic commerce.
Achieved excellent overall grade demonstrating strong academic performance.

Publications

- 14 peer-reviewed publications in leading journals and conferences related to artificial intelligence, machine learning, data mining, and natural language processing.
- Full publication list available upon request.

AHMAD AMMARI

Data Science & AI Professional

Microsoft CERTIFIED ASSOCIATE AI Engineer

Work History

Data Scientist – NLP Developer
University of Melbourne, Melbourne, Australia
Oct 2022 - Sep 2023

- Designed and deployed NLP models on AWS SageMaker for analyzing NDIS behavioral support plans.
- Contributed to an AI-based learning management system using natural language processing.
- Collaborated with cross-disciplinary researchers on an NDIS AI product.
- Leveraged Python, NLTK, Gensim, TensorFlow for NLP tasks.
- Applied advanced NLP techniques like Large Language Models (LLMs), prompt engineering, and few-shot learning to develop innovative natural language capabilities.
- Utilized LLMs like GPT-3.5 Turbo, GPT-4, Llama-2 for text generation and scoring.
- Fine-tuned Transformer models like BERT using synthetic datasets from LLMs.
- Optimized NLP models leveraging libraries like Flair, SentenceTransformers, SetFit, Argilla, SpaCy-LLM.
- Built vector stores with Qdrant for semantic similarity detection.

Senior Data Scientist
RACV, Melbourne, Australia
Apr 2021 - Oct 2022

- Migrated machine learning models from SAS to Python and R on Azure ML Studio.
- Built predictive models reducing member churn and increasing cross-sell.
- Applied data science to personalize insurance products.

Data Scientist
Deakin University, Geelong, Australia
Jul 2018 - Apr 2021

- Prototyped AI and machine learning models enhancing the Genie chatbot.
- Analyzed, trained, and deployed predictive models of student attrition using AWS SageMaker.
- Implemented a discussion topic recommender system using Spark and Kafka.

Data Scientist
Tribal Group, Geelong, Australia
Sep 2017 - Jan 2018

- Developed student withdrawal and progression predictive models for academic institutions.
- Built data pipelines to ingest, analyze, train, evaluate, and deploy student, faculty, course, and module data for learning analytics.
- Created Docker-based anonymization, testing, and quality assurance data models.

AHMAD AMMARI

Data Science & AI Professional

Work History (cont)

NLP Engineer
Hello Soda, Manchester, UK
Oct 2016 - Sep 2017

- Applied NLP and machine learning techniques to extract insights from social media data.
- Developed models using Python, TensorFlow, and Docker to predict demographic attributes.

Senior Data Scientist
eRevalue, London, UK
Feb 2015 - Sep 2015

- Analyzed social media data to identify insights and support corporate sustainability systems.
- Led text analytics projects that uncovered emerging sustainability topics from Twitter.
- Built data products that stream, process, and analyze real-time social media content.

Data Analyst
Peerius, London, UK
July 2010 - Dec 2010

- Built, tested, and analyzed large datasets using TSQL, DMX to create product recommendation models.
- Managed data extraction, transformation, loading, and cleansing processes.
- Communicated data insights to improve personalized recommendation algorithms.

Links to Professional Certificates

- Microsoft Certified Azure AI Engineer Associate
- Data Science Specialization
- Designing and Implementing a Microsoft Azure AI Solution
- AI for Medicine Specialization
- Neural Networks and Deep Learning
- Machine Learning, Stanford University
- Machine Learning Operations (ML Ops) Zoomcamp
